

Item Code: PPGWRAD 5 mil Elite Glossy Poly Pro w/Adhesive

Best used on applications such as window signs, boards or magnet material where adhesion and low maintenance is needed. The Elite polypropylene produces our highest quality indoor film signage. It has superior tear resistance and a microporous coating that give it the ability to reproduce photo quality images. Use with dye or pigment aqueous inks.

- Water resistant with dye & pigment inks
- High gloss, professional finish
- High color gamut with rapid drying times
- Extremely tear resistant

Applications

- Window Signage
- Boards and Magnate Material
- Photo Reproduction

Life Expectancy	Indoor 6 mo./outdoor 3 mo.

This product has been tested with Que Media, Millennium laminates. Pressure sensitive laminates provide the most aggressive bond and are recommended for use with this product. Lamination will help to extend the life of your print by reducing the rate of fade and protect against abrasion. Life extension varies due to climate and environment conditions.
